## **New Ballast Sensors, YAY!**

At Service School we talked about new sensors available for the 2018 to present models. Now we have software for the 2016 to present models. One little caveat to this, there are no 2016-2017 boats here to test on. Therefore if you run into problems let us know so we can address them! <a href="CLICK HERE\_">CLICK HERE\_</a> for further information. When submitting for warranty please <a href="replace all 3 part # 200338">replace all 3 part # 200338</a>

## **Warranty Transfers**

Any warranty transfer received during the month of April will not be processed until our Coronavirus shutdown is over. Please be patient as this is untimely for everyone involved.

## **Other Notable Field Fixes**

Field Fixes are **NOT REQUIRED** to be performed unless a customer experiences issues with these areas. Other field fixes that are now available include: driver seat shells, updated thruster flexible coupler, and GS hatches popping open. <u>CLICK HERE</u> for a link to view PDFs related to these fixes.
